

CHRISTIAN LEON

Software Developer

NJ 07047, United States | christianleon0224@gmail.com | (201) 491-1112

Portfolio: <https://cdl9.github.io>, GitHub: <https://github.com/cdl9>

PROFILE

Software Developer with a strong foundation in computer science and experience building full-stack web applications using React, Node.js, Express, PostgreSQL, and RESTful APIs. Skilled in designing software solutions that streamline business operations, automate workflows, and improve organizational efficiency through technology.

PROFESSIONAL EXPERIENCE

Operations Manager (Staffing and Logistics), Exquisite Staffing

Jan 2023 to Present

New York

- Managed staffing operations and workforce planning for 800+ employees across multiple venues, using operational data to improve staffing coverage and scheduling efficiency
- Generated and analyzed workforce, attendance, billing, and operational reports to support management decisions and identify performance trends
- Led monthly onboarding and training sessions for over 100 employees and supervisors, delivering structured presentations on company's policies and operational procedures

IT Support, Exquisite Staffing

Aug 2021 to Present

New York

- Designed and developed Excel-based automation tools using Power Query and VBA to process workforce data, generate management reports, and eliminate repetitive manual tasks
- Provided technical support and troubleshooting for Windows based systems, laptops, printers and peripheral devices, resolving hardware and software issues for employees
- Configured and deployed laptops, user accounts, shared resources, email groups, and cloud storage solutions to support daily business operations

Software Developer Intern, AnalytIQ

Jan 2021 to May 2021

- Developed the cross-platform mobile application for a workforce management platform using React Native
- Implemented task management, employee management, authentication, GPS navigation, digital forms, file uploads, and backend API connectivity
- Collaborated with a cross-functional team to integrate the mobile application with backend services and support a production application published on the Apple App Store

EDUCATION

B.S. Computer Science

New Jersey Institute of Technology, Newark

A.S. Computer Science

Hudson County Community College, Jersey City

TECHNICAL SKILLS

Programming: JavaScript, Python, C++

Frontend: React, HTML5, CSS3

Backend: Node.js, Express.js

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, Figma, Microsoft 365, Excel (Power Query, VBA), Postman

CERTIFICATIONS

Developing Back-End Apps with Node.js and Express, IBM	2026
Google IT Support Professional Certificate	2025
AWS Cloud Practitioner Essentials (In Progress)	2026

PROJECTS

Event Management App (In Progress), <https://cdl9.github.io/exquisiteApp/>

- Developed a full-stack event staffing application using React, Node.js, Express, and PostgreSQL to manage events, employees, roles, and staffing assignments
- Implemented RESTful APIs and CRUD operations to manage business data, enabling efficient creation, retrieval, updating, and tracking of events, employees, roles, and staffing assignments.
- Designed relational database schemas and integrated PostgreSQL for persistent data storage and scalable backend data management
- Structured a modular architecture using reusable React components and Express routing to improve maintainability and future scalability

Weather Dashboard Web App, <https://cdl9.github.io/weatherApp/>

- Developed a responsive weather dashboard integrating real-time API data to deliver dynamic location-based forecasts
- Built interactive data visualizations (temperature, wind, humidity) using Recharts, improving user understanding of weather trends
- Integrated map layers using Leaflet to enhance geographic visualization and user interaction
- Managed asynchronous data fetching with loading/error states to provide a better understanding in case of failures
- Designed and implemented persistent city storage using localStorage, enabling personalized user experience
